Makaton Wonders Club

Spring Term 1 - 2017

In Makaton Wonders Club this term we entered the world of labybirds or ladybugs!! We researched their life cycle and key features. This was achieved by watching videos, reading books "the bad tempered ladybird", talking and signing.

The children made hats to look at the colours, antennae and dots of a ladybird which reinforced the features.

We used paper plates to talk about; What they looked like? how they moved?, what they ate? And where they lived?.

We used the Makaton site and books to help us with our signing.
