Science

Invertebrates

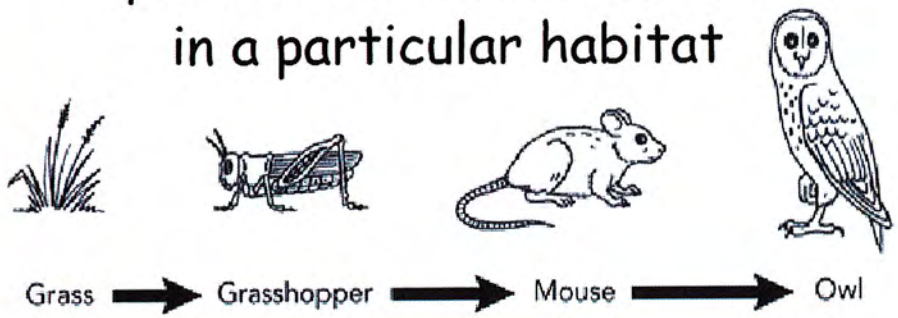
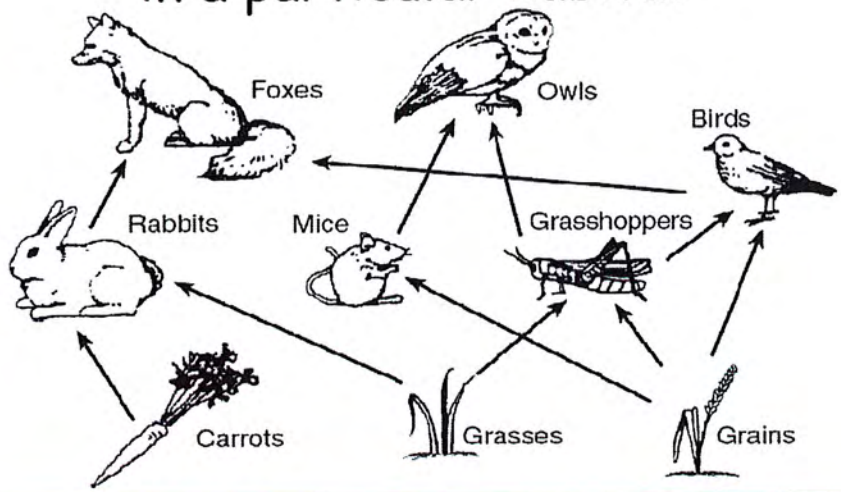
Food chain - linear

A process where organisms depend on each other for food in a particular habitat



A process where MANY organisms depend on each other for food in a particular habitat



Vertebrates
Animals WITH a backbone or vertebrae

Aerobic respiration
A process where organisms get their energy from glucose using oxygen

Invertebrates
Animals WITHOUT a backbone or vertebrae

Photosynthesis
A process where plants make their food using energy from the sun

Organisms
Living things (plants and animals)

Habitat
A place where organisms live
