

# YEAR 10 LAND BASED STUDIES

This term they will be learning about how to transfer plants and vegetables from pots and trays to the ground. They will also learn how to maintain the health of the plants and vegetables and control common pests and weeds. The conclusion will then be harvesting a food or flower crop.

Task to complete	Tick when completed
Watch a gardening programme on TV and then write a sentence about what it was about, what tools they used, vegetables, flowers or fruit they grow.	
Write down a list of 6 benefits you get from doing gardening e.g. Fresh air.	
List some common pests in the garden and how to control them.	

## Extension Activity

Create a PowerPoint on a vegetables of your choice. Find out the following:- How do you grow them, what time of the year do you grow them, when do you know when to harvest them and any other interesting facts e.g. largest ever.
